Stories from war correspondents in northern France have already mentioned the fact that British naval guns have been used on land in slege opera-tions against the Germans. Therefore there can be little harm in disclosing the fact that at present a very large number of men are engaged constantly at Devonport in turning 12, 13 and 15-inch battelship guns into siege how-

Chick Feed Calenda

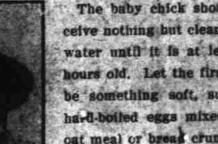

THE FIRST TEN DAYS

The baby chick should receive nothing but clean fresh water until it is at least 24 hours old. Let the first feed be something soft, such as hard-boiled eggs mixed with out meal or break crumbs, or stale bread soaked in milk.

If hard-boiled eggs are used put them through a feed chopper, shells included, and then mix with five times their bulk of rolled oats. Add

a little sharp grit and powdered charcoal and feed on shallow wooden plates, four to five times daily, for the first three days. By this time the little fellows will have learned to eat and
